

# Transient

## Disposable Decontamination Tents

The Transient is a disposable tent system suitable for use as a multi-stage airlock and is ideally suited for the asbestos removal industry. The Transient can be simply and quickly constructed, with the metal tent poles being easily attached to the disposable tent skins via pre-cut sections.

As the Transient poles remain outside of the tent skin, they do not become contaminated during works and can be used again.

### Key features include:

- Quick & easy set up - offering a quicker alternative to traditional timber and polythene set ups
- Range of sizes available to suit various projects
- Tough and robust once assembled
- Reduce site waste as all tent frames are reusable, with the tent skins taking up less space in an asbestos skip compared to timber
- Additional items include 3 x 4-part Asbestos Warning signs, 'Dirty End' & 'Clean End' labels, coverall hangers for use inside the tent
- Uncut external entrance & exit to allow for flexible positioning on site
- Internal weighted flaps

### Product Codes

B000947 Transient, 90cm x 2m, 3 Stage

B000950 Transient, 1m x 2m, 3 Stage

B000948 Transient Poles, 90cm

B003703 Transient Poles, 1m (1 Stage)

B000951 Transient Poles, 1m (3 Stage)
